I've been looking at your work on digital photography, and I'm very impressed by the quality and the ideas that go behind your work. I find your work very interesting and very useful. At the minute I'm using your work to relate to my project. I wondered if it would be possible that you could send me any of your basic skills that you personally use to get such good results, e.g, Monalisa.

Thanks for reading this.

I do hope to hear from you soon,

Adam Brandon Chapman.
