Dear Mr. Meyer,

during the last years, I followed after your personal work and after the work you do as a pioneer and an "evangelist" of the relationships between photography and the digital realm: I want to express my sincere appreciation for what you do and to thank you -as an artist and as a teacher- for all the energies you spend in advancing those fields.

I would like to invite you to a visit and point your attention to the on-line exhibition I just "hanged" at:

The exhibition will be accessible until the end of October 1999.

If you will find the work to be interesting, any critics from you and/or a link from one of your sites will be very much appreciated.

Thanks,

with sympathy,

Jonathan Sierra
