I was told of your web site by a friend and have been very impressed by what I've found in it. My name is Bill Hogan; I've been a professional photographer for over 20 years. Recently I've begun doing some personal digital work which I'd like to find somewhere to show it. After looking over your web site (and liking what I saw) I'd like to see about putting some of my pieces on it. Can you advise me if this is possible and, if so, what steps I'd need to take to do so. The images are digitally created and combine words with images.

If this is something you don't deal with could you inform me who I would contact.

On the off chance you are the right people to talk to I'm going to send an attachment containing a sample of my work. It's in a BMP format for PC.

Thanks. I enjoy the site. Keep up the good work.
