Just wanted to let you know how much I enjoyed going through your site. I teach at New York City Technical College after being in this industry for over 40 years.

The class I teach is a Foundations class for Graphic Arts. My student are both in the production end of graphics (printing) and the creative. In my class we touch on every facet of the industry. Needless to say that photography (both conventional and digital) is part of the class.

I will be giving all the students the address of your site as a reference in the handouts and want to make sure that this is ok.

Thanks again

Annette Wolf Bensen
