Dear ZZ, (excuse my bad english).

I register your site because it hurt me when I saw it. The photographers work is a quality one, which I never seen elsewhere on the net. The access is rapid, the presentation is clear. Presented works are serious but with many styles and techniques.

You present not only photographies but also some articles. I feel people behind this site are motivated by photo. This is the positive points. Perhaps, to be negative, it would be interesting to have more interactions with people through this site (for example, some critiques). Perhaps to invite people (e.g. some "great" photographers to talk about their work or another one).

Thanks & best regards.
