Dear Zone Zero,

I would like to register with you. For a couple of years now I have been doing digital photos (which I actually call photopeinture as I believe digital images are another medium - not photography - which is another hobby of mine). It was by accident that I came across your web site but since that I regularly check it out to see the new galleries and portafolios. I am working in Sri Lanka with an international humanitarian organization and as such have the opportunity of traveling to most parts of the island including conflict areas and taking pictures.

I partucularly like your galleries and portafolios. Also, and I guess an added attraction for me, I grew up in Mexico. Anyhow, hope to learn more from you.

All the best

Patrick.
