I have recently discovered Zone Zero. It is a wonderland for browsing and exploring....and an extra special treat since I have studied Spanish all my life! I first encountered Pedro Meyer back in the early 90s when I was working in Instructional Computing at the State University of NY at Stony Brook. I recommended we purchase his CD "I Photograph to Remember" from Voyager. I found it tender, inspiring, and very innovative.....I am only sad now that I didn't follow his lessons and also capture/photograph my parents in this less-than-beautiful stage of life.

I look forward to many fond hours of surfing! I feel like I am in the presence of a master. Bravo for the great job you've done so far!
