Hi Zone Zero,

I'm really impressed with your site and more importantly its contents. I'm a professional photographer and a professional Digital guy, and your leading article (B&W or Colour) was very much "bang-on" in my opinion. As a photographer, I still prefer film to a digital back. Film, if shot properly still delivers a richness of tones that I have yet to see in digital exposures, add to that the fact that I don't want to pay \$40,000.00 for a professional back which can deliver the goods! Anyway... it's late and I have to get back to work. I've added your link to my 'upcoming' website. Hope you don't mind.

Ciao,

Carson Jones
