Hi,

My name is Fernando Fogliano. I am from Sao Paulo, Brazil and I am connected to digital photography in many ways. The begin of my professional life was in the scientific field, I worked at the Astronomy Department of IAGUSP, and there I took contact with scientific imaging. I studied Semiotics (Master, PhD) at Pontificia Universidade Catolica de Sao Paulo researching on digital imaging. After these studies I began to teach digital photography at SENAC. This is the first graduation course in photography in Brazil (as long as I know). Besides I am a photographer and researching on photography at SENAC.

I would like to express here my admiration for Pedro Meyer's work. I think it represents one of the most important contributions to contemporary photography.

Fernando Fogliano
