Hi,

My name is Francesco Imperato and I study cinema and television in Italy, where I live. As you can nderstand my interests in visive arts bring me to explore also the photography field that I'm exploring and learning little by little.

I've been in many photo sites and finally I found this one. I saw some portfolios and I think the quality of people registered here it's very high...that's why I want to register...to exchange opinions, and have suggestions by other people.

I found this site thanks to a friend that suggested it to me as a good photo site.

Thanx

and happy xmas!

Francesco Imperato
